

EndoFLIP[®] 
Endolumenal Functional Lumen Imaging Probe

Imaging solutions *in the Esophagus and Stomach*

**EndoFLIP[®] Endolumenal Functional
Lumen Imaging Probe**

CROSPON[™]

EndoFLIP® Technology

The EndoFLIP® Imaging System uses impedance planimetry and catheter based pressure measurement to measure the dimensions and function of a variety of hollow organs and sphincteric regions throughout the gastrointestinal tract. These measurements are useful for different types of procedures such as:

- Evaluation of GERD, Achalasia and Eosinophilic Esophagitis
- GERD and Achalasia surgery
- Bariatric surgery

Description

Part No

EndoFLIP® System	EF-100
EndoFLIP® Probe 25 mm	EF-325
EndoFLIP® Catheter - Upper GI measurements	EF-325*
EndoFLIP® Catheter - Gastric Band Adjustment	BF-325
EndoFLIP® Catheter - Sleeve/Plication Measurement	EF-620
EndoFLIP® System Cart	EF-400
EndoFLIP® Printer mounting shelf	EF-401
EndoFLIP® Keyboard mounting shelf	EF-701
EndoFLIP® External Endoscope Channel	EF-800*
EndoFLIP® 43F Sleeve Bougie	EF-900*

*FDA 510k pending
